

AM SOLUTIONS

Chemist Warehouse Group

The screenshot shows the Microsoft Dynamics AX2012 user interface. The main window is titled "OMS Interface Parameters (1)" and contains the following sections:

- Connection:** Database connection: AX2012_Interface, Sales header table: stg_SALESTABLE, Sales line table: stg_SALESLINE.
- Posting:** Allow partial order:

An "ODBC Connections" window is open in the foreground, titled "ODBC Connections (1) - Database: AX2012_Interface". It displays a table with the following data:

Database	Description	DB server name	Database name
AX2012_Interface	AX2012 OMS Staging DB	tAX2012_InterfaceDBs	AX2012_Interface

The background window also shows a "Journals" section with a tree view containing: Customer unmerge, Price/discount, Payments, and Bill of exchange.

Project Summary

AM Solutions is a 6bn AU\$ retail organization that enjoys rich customer-base from across the world. AM Solutions clients are operable to an array of brands including Chemist Warehouse, My Chemist, Discount Vitamin Warehouse, Beauty, and Fragrance. The company provides a backend operational assistance for accounts, stocks, payrolls, HRM, global logistics management/supply chain and warehouse management.

Currently, AM Solutions is commanding the aforesaid services mix with the third-party arbiters. The project under the lens has been suggested to enhance the International Trade & Logistics Management (T&L). AM group wanted centralization of the order processing system and also meet with the customer/legal requirements. It had intended to bring efficiency in the flow of its goods from the point-of-origin to the point-of-consumption.

Executive Summary

In the up gradation project, AM Solutions elevated its need for reinforcing its T&L module. Raybiztech's Dynamics AX champs have mutually worked together with AM Solutions Trade & Logistics module that were to be centralized for order processing.

Dynamics AX has "out-of-cork characteristics" such as Accounts receivables/payables and inventory. Raybiztech professionally handled the customization for Dynamics AX 2012 T&L module and urgently delivered the enhancements. Radically, Microsoft Dynamics AX has been an immense support system for such a company with large business entities and humungous data.

Challenges & Implications

- ❖ Single order Inbound processing system for multiple/3rd party systems was toilsome
- ❖ Product release for large business entities with huge database was a constraint again

Solution

Ray Business Technologies has diagnosed client's multi-fold business/application threads and conducted a chain of buzz discussions before dispensing any solution plan. Ultimately, it has decided to utilize the SQL server as a staging DB for achieving a single inbound process.

- ❖ Realizing a single inbound process for multiple 3rd party systems is complicated. Nevertheless, our engineers coiled an external order system that has the sovereignty to push data to SQL server (staging table). The single inbound permits readability of the data from the staging table & create orders in Dynamics AX. Application can underpin all the futuristic versions of Dynamics AX
- ❖ Auto-batch process is designed to release products across all the 800 plus entities

Welcoming Benefits of Microsoft Dynamics AX

- ❖ Auto-product release mechanism reduces the physically handled efforts by 90%
- ❖ Auto-warehouse engagements reduces operational expenditures by 80%
- ❖ Centralized system can exercise online client requirements
- ❖ Company will invariably benefit with the addition of new business entities with the passage of time

- ❖ The alternative solution chalked by Raybiztech dumps many third-party systems like PEPS/Kofex out of the track

Key criteria for selecting Dynamics AX

- ❖ Dynamics AX 2012 R3 adds value proposition & the revenue margins to the business
- ❖ Proven remedial solution (Dynamics AX) manages master data with utmost consistency
- ❖ Full automation of warehouse processes helps in escaping the unaccountable cost of operations
- ❖ Creates fiscal estimates/budgetary plans/templates for Microsoft Excel

About the company:

Founded in 2009, Ray Business Technologies Private Limited is a Global Information Technology (IT) Services and Solutions company. Our strong systems and processes; CMMI Level 3, ISO 9001:2015 & ISO 27001:2013 Certified; enable our excellent team of Technology Professionals to provide cutting-edge IT Solutions to Enterprises worldwide, empowering them to utilize available resources and manage their operations effectively by improving efficiency, optimizing services, securing information and reducing costs in North America, Australia, Canada, Europe, Middle East and Asia.

Raybiztech offers comprehensive end-to-end IT Services for Business Application Development, Enterprise Solutions, Enterprise Collaboration Services, Testing and Quality Assurance Services, Embedded Systems, Cloud Computing and IT Infrastructure Management to organizations in the Banking & Finance, Insurance, Healthcare, Manufacturing, Retail, Media & Entertainment, Leisure & Travel, Telecom and Energy & Utilities verticals as well as Independent Software Vendors.
