BI Integration with
Microsoft Dynamics SL

OCT, 2017

The powerful BI industry of the millennium is dexterous enough to deal with gigawatts of data that has led to the rising demand of numerous BI-kits ready to be integrated with Microsoft Dynamics SL (formerly Solomon). The established accounting tool is combined with Power BI functionality to turn transactional data into actionable info-cubes. Power BI is a coherent suite of business analytics tools that deliver organizational insights like never before. It produces impelling reports that are to be sparked for publication on the web and across the multi-utility devices. Dynamics SL integration with BI landscape offers up-to-the-minute reporting, budgeting, dashboards, consolidations, and data storage options for the project-driven small and medium-sized enterprises.

Challenges & Constraints

Earlier, when Microsoft Dynamics SL was not withstanding with BI integration, the system was inhibited with malignant technical glitches. The system was deficient of the configurable storage applications (OLAP cubes), rigorous reporting, mixed add-ons, and various user-centric components to complement the needs of the corporate entities.

Benefits of the Integrated Solution- Dynamics SL BI

- **OLAP Cubes, Stable & Quicker Means for Obtaining Data**
The less frequent reports are easily obtainable from the data warehouse or OLAP cubes (online analytical processing) within a fraction of seconds. These multi-dimensional spreadsheets are configurable storage applications that form the databases of your company.
- **Dynamics SL BI comes with Attractive Excel Add-ons**
Excel add-in solutions attracts thousands of entrepreneurs as they do not require supplementary knowledge, learning of formulas, features, and functions. All these add-ons are already working within the proprietary solution.
- **Familiar User Environment offers Error-free Reporting**
User-friendly components such as Tableau, MS SQL Server, and Microsoft BI technology can guarantee you with zero worries on report upgrades. Integration offers easy-of-use environment as similar to Microsoft Office products (Excel, Outlook, or Word).
- **Pocket-friendly Purchase of Business Essentials & Advanced Designer license**
Designer license comprises of Administrator and Designer roles within Management Reporter allow the user to design, administer, and view reports while enjoying access to Report Designer/ Report Viewer applications.
- **Excel-powered Rapid Reporting on Mobile Application**
The sophisticated BI Dynamics SL is a priceless integration for many organizations as it facilitates accessibility of web-based BI reporting on the mobile applications. Full BI product suite is valuable option for generating report from BI Dynamics SL rather than using any other stand-alone software. To be frank, the size of the query and those reports that are running in the live stream may slow down the Dynamics SL server.

Feature Pack of Microsoft Dynamics SL Business Intelligence

- Business Analyzer offer you with the role-based Microsoft Excel charts & graphs inside the Microsoft Dynamics SL client and outside via companion application
- Create personalized dashboards encapsulated with visual vista of your business enterprise
- Data integration methodology engrained in BI solution can accelerate Dynamics SL
- View SQL Reporting Services & reports from the interactive Management Reporter Viewer app using a single location
- Modify or create unlimited number of reports using industry's leading report writer included in the Microsoft Dynamics SL System Manager
- Crystal Reports provides robust reporting & query capabilities to all the experienced/amateur users
- Quick Query Web App straps over 100 pre-defined views of your financial data. Interactive screen sort/filter information and link to the custom SQL Server view. Quick Query Web App provides data access on smartphones, tablets or desktops
- Quick Query Editor binds with the custom SQL Server views & choose as to which fields to show and which Microsoft Dynamics SL screen to drill-off
- SSRS Report Writer in Microsoft SQL Server are made to create, edit & host SQL Server Report
- Microsoft Forecaster (FRx) in Dynamics SL 2011 or earlier versions is the cost-effective method to realize the benefits of a realistic budgeting & planning application
- Wide range of reporting & analysis tools help in accessing of the ready-to-use information for making informed decisions
