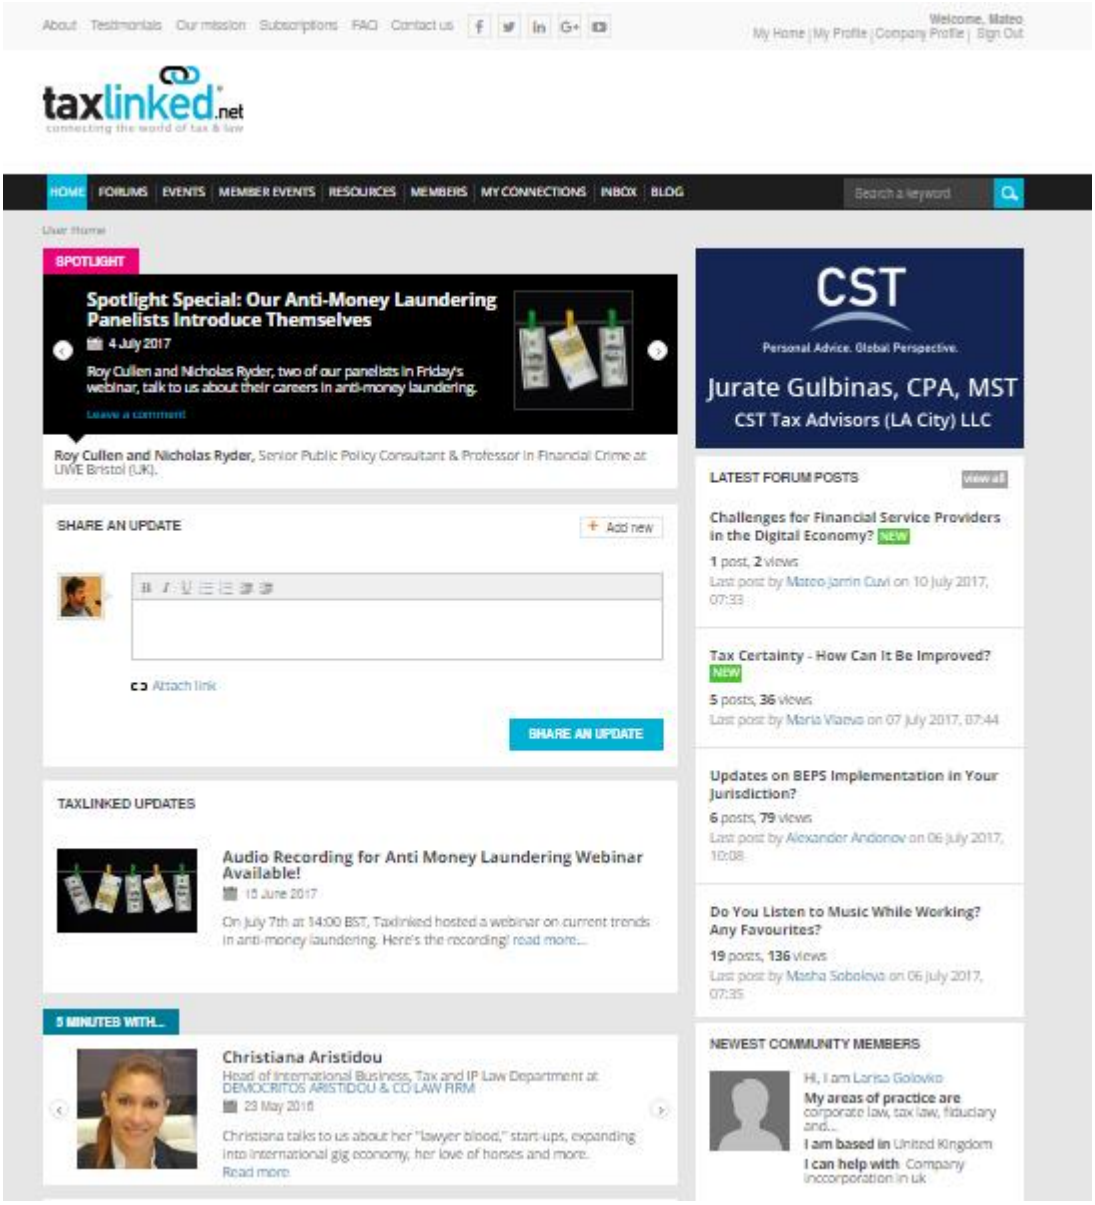
taxlinked.net
connecting the world of tax & law



Microsoft Partner
Microsoft Dynamics
Xamarin
Windows Server
Microsoft .NET
Microsoft Azure
SharePoint
Microsoft SQL Server
Power BI

Project Summary

Taxlinked.net is an international online tax community based outskirts of Europe. It is a unified café or an online meeting point for all the acclaimed tax professionals, fellow advisers, lawyers, law firms, trustees, banks, company formation agents and tax clients looking for the futuristic opportunities in the tax stream.

Taxlinked network was in a deep need to design an ultimate hub for the intellectual members for availing the chance of getting interactive with the concentrated tax professionals materials, messages, comments and more. The prospective project would be helpful in rewarding financial gains along with the expansion of the knowledge graph of the individual/groups in the tax circuit.

Executive Summary

- Taxlinked.net owned a web application that was unconditionally large, chunky and was discrepant of the most basic interactive feature to bind the beneficiary members online. The so called user-friendly application had turned away from offering smooth navigation while disrupting flow of communication in the network.

- Client was upset with it's poorly rated web search engine that has caused unpredicted delays in member registration leading to diminution of business prospects. Thus, the very intention of retaining an interactive web search application was compromised under such extreme circumstances.

Challenges & Implications

- Engrained challenge was to facilitate integration with TokBox, Platform-as-a-Service (PaaS) into the hosted infrastructure for customer interaction
- Core integration of the hosted system with the critical 3rd party tool –TokBo for building live interactive chat/video/voice messaging and screen sharing into the web/mobile app was tough mandate
- It was an obstacle to bring about the file/documents exchanges during the ongoing text chat/voice/video calls as TokBox was not at all compatible with the aforesaid traits
- User chat box detained to provide any other features apart from adding additional chat participants
- Send messages, minimize & close options remained a setback

Solution

- Raybiztech was able to provide restorative technology solution to the client in an optimistic way. It worked jointly with the client to participate in a series of super-studio sessions on standardization of the web search.
- It eventually developed intuitive accelerators and solutions that enabled the client to safeguard its majestic business margins while securing client churn-outs.
- Our Kentico developers made an inch-perfect examination of the technologies at the underground levels and consequently administered Kentico open source CMS with Web API for 3rd party integrations.

- Integration with TokBox vitalize embedded communications combined with live interactive chat/video/voice messaging & screen sharing
- File/documentation exchange implementation gained with ease of use features
- User wise box revamped with superlative features such as group information, withdraw participants & exit conversation

Benefits of Kentico CMS with Web API on Business Cases

- TokBox is a Platform as a Service (PaaS) solution used hosted infrastructure, APIs & tools required to deliver enterprise-grade WebRTC capabilities
- Alternative solution drafted by Raybiztech exposed Taxlinked network with the world of exposure
- Prodigious platform offer the fellow members of Taxlinked.net to interact online & establish business relationship beyond the cultural boundaries

Key criteria for selecting Kentico CMS

- Highly maintainable Kentico CMS 8.2.24 offer all of the mandatory modules necessitated by Taxlinked.net
- Content staging alternatives available while working with multi-versions of the hosted site
- Seamless Document Management System frameworks
- Smooth transformation of persistent UI without barricading the business
- Quick integration with 3rd party applications via Web API
- Flexibility to choose between “Code First” & “Data First”
- RAD-Rapid Application Development
